Care instructions

Surface : To maintain the aesthetic appearance of stainless steel equipment, make sure to use a non-acidic and solvent-free product, otherwise rust will appear regardless of the type of stainless steel.

Inside liner : Clean with a brush to remove ash residues. Can be washed with water and mild soap provided that it is wiped dry afterwards. Pouring water to sit inside the liner will promote premature rusting.

Important notice: Probbax products are designed to longer withstand bad weather conditions. However, harsh chemicals (containing solvents), salted water in coastal environments, scratches, bumps, dents, and/or stagnating water inside the liners will contribute to shortening the products' lifespan.
