## Care instructions

**Surface** : All epoxy coated products should be cleaned with either a soft cloth or a brush, using a solution of mild soap and warm water.

**Inside liner** : Clean with a brush to remove ash residues. Can be washed with water and mild soap provided that the liner is wiped dry afterwards. Pouring water to sit inside the liner will promote premature rusting.

**Important notice:** Probbax products are designed to longer withstand bad weather conditions. However, harsh chemicals (containing solvents), salted water in coastal environments, scratches, bumps, dents, and/or stagnating water inside the liners will contribute to shortening the products' lifespan.
