## Care instructions

**Surface** : All epoxy coated products should be cleaned with either a soft cloth or a brush, using a solution of mild soap and warm water.

**Inside** : Clean with a brush to remove ash residues. Can be washed with water and mild soap provided that the liner is wiped dry afterwards. Pouring water inside the liner will promote premature rusting.

**Important notice:** Probbax products are designed to longer withstand bad weather conditions. However, harsh chemicals (containing solvents), salted water in coastal environments, scratches, bumps, dents, and/or stagnating water inside the liners will contribute to shortening the products' lifespan.
