| Material                         | SS 304                     |

## Care instructions

**Surface :** To maintain the aesthetic appearance of stainless steel equipment, make sure to use a non-acidic and solvent-free product, otherwise rust will appear regardless of the type of stainless steel.

**Inside:** Clean with a brush to remove ash residues. Can be washed with water and mild soap provided that it is wiped dry afterwards. Pouring water inside the liner will cause premature rusting.

**Important notice:** Probbax products are designed to longer withstand bad weather conditions. However, harsh chemicals (containing solvents), salted water in coastal environments, scratches, bumps, dents, and/or stagnating water inside the liners will contribute to shortening the products' lifespan.
